

I am opposed to changing the telephone privacy act. I used to get 5-6 telephone calls a day and sometimes they would call many numbers and it would ring me and when I answered there was a dial tone. I watch grandkids and they take a nap and it was very aggravating to get all these calls. I haven't had more than 3 or 4 calls since I had telephone privacy put on my phone. I now have caller ID but that doesn't stop the phone from ringing. I think it should be left alone and we can have peace in our house at nap time, dinner time and bed time and any other time they pick to call.
